

FUTURE FOOD SYSTEMS: HOW MIGHT THEY BE HEALTHIER AND MORE SUSTAINABLE?

Food systems in low and middle-income countries are changing rapidly. This conversation will examine current food systems thinking, including research describing drivers of **dynamic change** such as urbanization, incomes, markets, and environment.

Technical, market, government, and nutrition experts in urban and national food systems will explore current and future food system **innovations**, and audience members will share **interventions**.

Perspectives from countries including Bangladesh, Vietnam, Nigeria, and Ethiopia, and voices from elsewhere in Asia, Africa, and Australia, will spur a practical, **solution-oriented** discussion on tradeoffs, synergies, and opportunities for partnership.

INTERCONTINENTAL
HOTEL WEDNESDAY
28 NOVEMBER
8:30 TO 10AM
